Education

University of California, Santa Barbara (UCSB), CA, USA — Sep. 2018 – present

Pursing Ph.D. in *Electrical and Computer Engineering*, *GPA*: 3.91/4.0;

Northwestern Polytechnical University (NWPU), Xi'an, China — Sep. 2014 – Jun. 2018

B.Eng. in *Detection, Guidance and Control Technology*

Research Experiences

Uncertainty & Data Analysis Lab at UCSB — Sep. 2018 – present

Graduate Research Assistant, Supervisor: Prof. Zheng Zhang

Research Interests: Uncertainty Quantification (UQ); Tensor learning
Aim to develop general UQ and tensor data analysis techniques, and apply them to various applications including machine learning, design automation, control systems, medical imaging and so on.

- Designed an efficient UQ framework for computer architecture based on mixed-integer programming: speed up 100x than Monte Carlo.
- Proposed a compact tensor regression model for high-dimensional UQ problem: lead to linear complexity on dimension.
- Proposed an active tensor learning framework for efficient undersampled MRI reconstruction.
- Solved polynomial-type chance constraint programming for Photonic IC design under uncertainty with a tighter constraint approximation.

Intelligent Information Processing Lab at NWPU — Sep. 2015 – Jun. 2018

Undergraduate Research Assistant, Supervisors: Prof. Wen Jiang & Prof. Yong Deng

Research interests: Uncertainty Analysis; Information Fusion; Quantum Decision Theory.

- Proposed evidential and quantum frameworks to model decision making process, which can explain lots of paradoxes in the classical probability theory.
- Proposed effective uncertainty representation models to solve information fusion and decision making problems under epistemic uncertainty.

The Hong Kong Polytechnic University — Jul. 2017 – Aug. 2017

Summer Research Intern, Supervisor: Prof. Felix T.S. Chan

Teaching & Talks

- Teaching assistant of *ECE 15A* (Foundations of Logic Design), UCSB — Winter 2020
- Teaching assistant of *ECE 139* (Probability & Statistics), UCSB — Spring 2019
- Conference talk on *ICCAD*, Westminster, CO, USA — Nov. 2019
- Conference talk on *8th China Information Fusion Conference*, Xi'an, China — Jul. 2017

Selected Honors & Awards

- Outstanding Teaching Assistant award in Department of ECE, UCSB — 2020
- Graduate Fellowship in Department of ECE, UCSB — 2018
- The NWPU Special Scholarship of Yajun Wu and Aviation Industry Corporation of China (top 3%) — 2016, 2017
- Meritorious Winner in Interdisciplinary Contest in Modeling (awarded by COMAP) — 2016

Others

Programming Skills: Python, Matlab, C, C++, R, Mathematica, Keil, LaTex, etc.
Independent reviewer of journals:

- *IEEE Transactions on Computer-Aided Design of Integrated Circuits and Systems (TCAD)*
- *IEEE Transactions on Cybernetics*
- *Information Sciences*
- *Computers & Industrial Engineering*
- *Science China Information Sciences*

Graduate Courses: Linear Systems, Machine Learning, Convex Optimization; Optimal Estimation and Detection, Scientific Computing, Matrix & Tensor Analysis, Game Theory, etc.
